

Identification System for Physical Access and Time/Attendance

IDLink NetFinger 5000

About IDLink Systems

Founded in 2002, IDLink Systems is a manufacturer and leading provider of identification solutions. It specializes in contact-less biometric authentication technologies such as Palm Vein and 3D Facial Recognition.

IDLink also provides a web-based administration platform to manage multi-modal identification devices and to administer user enrolment processes.

IDLink Systems operates out of Singapore with investment funding from the Economic Development Board of Singapore as well as private investors.

The NetFinger 5000 access control security system is an advanced product made possible by combining fingerprint recognition algorithm, optical sensors and embedded design technology, and software application technology for optimal performance. In addition, unlike other existing access control systems that use passwords or ID cards exclusively, the NetFinger-5000 is free from risks such as losing the ID card or forgetting the password, or abusing illegally copied cards, thereby giving added convenience and security.

It is also designed to maximize performance efficiency by enabling integrated remote monitoring and systematic management of the independently operated PC terminals in a network system.

Features

- ▶ 5.7" true color LCD with Touch
- ▶ High speed 1:N authentication
- ▶ USB memory slot
- ▶ Remote control and real time access monitoring by means of server program
- ▶ Auto-on function and live finger detection
- ▶ Template capacity of maximum 100,000 templates
- ▶ Log capacity of maximum 1,000,000 events
- ▶ Supported WiFi (optional)
- ▶ Fingerprint image display & quality check
- ▶ User friendly interface

Description	Specifications
CPU	32bit / 620 MHz
LCD	5.7 inch true color with touch
1:1 Verification time	Less than 0.5 second
1:N Identification time	Less than 1 second (2000 templates) Less than 1.2 seconds (4000 templates)
False Acceptance Rate (FAR)	1 in 100,000
False Rejection Rate (FRR)	1 in 1,000
